12. Develop a mobile application to send an email.

```
AndroidManifest.xml x
1  <?xml version="1.0" encoding="utf-8"?>
2  <manifest xmlns:android="http://schemas.android.com/apk/res/android"
3      xmlns:tools="http://schemas.android.com/tools">
4      <application
5          android:allowBackup="true"
6          android:dataExtractionRules="@xml/data_extraction_rules"
7          android:fullBackupContent="@xml/backup_rules"
8          android:icon="@mipmap/ic_launcher"
9          android:label="EmailApp"
10         android:roundIcon="@mipmap/ic_launcher_round"
11         android:supportsRtl="true"
12         android:theme="@style/Theme.EmailApp">
13         <activity
14             android:name=".MainActivity"
15             android:exported="true">
16             <intent-filter>
17                 <action android:name="android.intent.action.MAIN" />
18
19                 <category android:name="android.intent.category.LAUNCHER" />
20             </intent-filter>
21         </activity>
22     </application>
23 </manifest>
```

```
AndroidManifest.xml MainActivity.java x
3 import android.os.Bundle;
4 import android.view.View;
5 import android.widget.Button;
6 import android.widget.EditText;
7 import androidx.appcompat.app.AppCompatActivity;
8 public class MainActivity extends AppCompatActivity {
9     EditText email, subject, message;
10    Button sendButton;
11    @Override
12    protected void onCreate(Bundle savedInstanceState) {
13        super.onCreate(savedInstanceState);
14        setContentView(R.layout.activity_main);
15        email = findViewById(R.id.email);
16        subject = findViewById(R.id.subject);
17        message = findViewById(R.id.message);
18        sendButton = findViewById(R.id.sendButton);
19        sendButton.setOnClickListener(new View.OnClickListener() {
20            @Override
21            public void onClick(View v) {
22                String recipient = email.getText().toString();
23                String sub = subject.getText().toString();
24                String msg = message.getText().toString();
25                Intent intent = new Intent(Intent.ACTION_SEND);
26                intent.setType("message/rfc822");
27                intent.putExtra(Intent.EXTRA_EMAIL, new String[]{recipient});
28                intent.putExtra(Intent.EXTRA_SUBJECT, sub);
29                intent.putExtra(Intent.EXTRA_TEXT, msg);
30                startActivity(Intent.createChooser(intent, "Choose Email Client"));
```

OUTPUT:

The screenshot displays the user interface of the email client application. It features three text input fields stacked vertically, each with a placeholder label: "Enter Recipient Email", "Enter Subject", and "Enter Message". Below these fields is a prominent blue button with the text "Send Email". The entire interface is set against a light pink background.
