Write JavaScript to validate the following fields of the Registration page.

a) First Name (Name should contains alphabets and the length

Should not be less than 6 characters).

b) Password (Password should not be less than 6 characters length).

**c) E-mail id (should not contain any invalid and must follow the
standard pattern name@domain.com)**

d) Mobile Number (Phone number should contain 10 digits only).

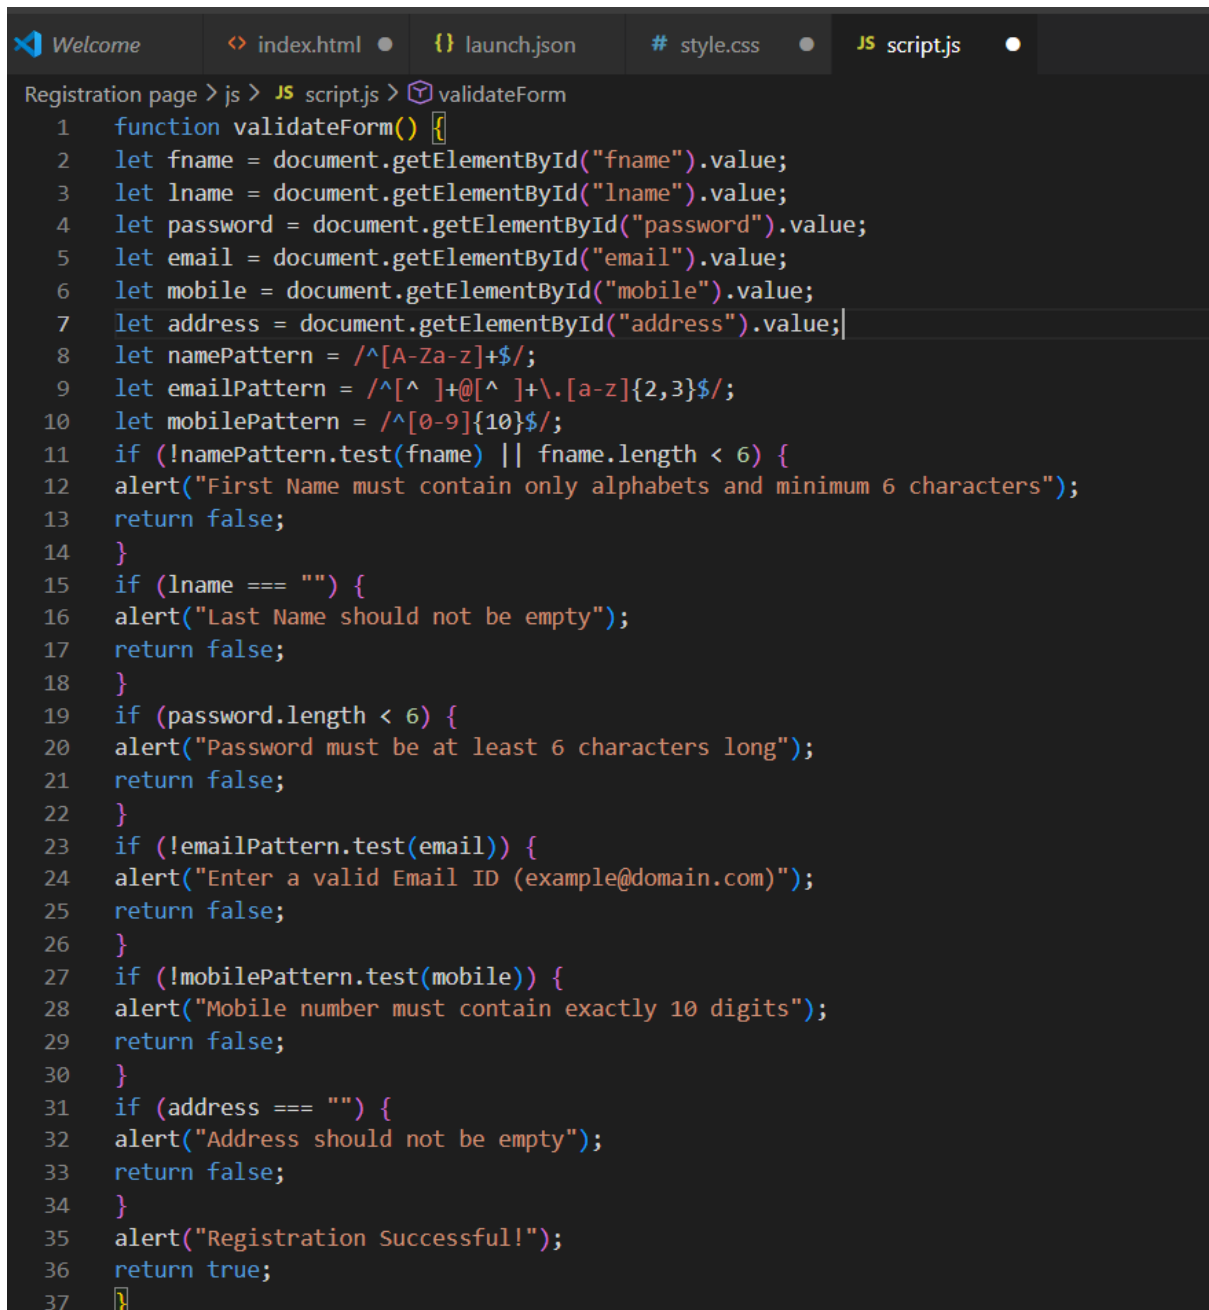

e) Last Name and Address (should not be Empty).

VS Code interface with tabs: Welcome, index.html, launch.json, style.css, script.js. The breadcrumb path is: Registration page > index.html > html > body > div.container > form > textarea#address. The code is an HTML registration form with fields for First Name, Last Name, Password, Email ID, Mobile Number, and Address, followed by a Register button.

```
1 <!DOCTYPE html>
2 <html lang="en">
3 <head>
4 <meta charset="UTF-8">
5 <title>Travel Guide Registration</title>
6 <link rel="stylesheet" href="css/style.css">
7 <script src="js/validation.js" defer></script>
8 </head>
9 <body>
10 <div class="container">
11 <h2>Travel Guide Registration</h2>
12 <form onsubmit="return validateForm()">
13 <label>First Name</label>
14 <input type="text" id="fname">
15 <label>Last Name</label>
16 <input type="text" id="lname">
17 <label>Password</label>
18 <input type="password" id="password">
19 <label>Email ID</label>
20 <input type="text" id="email">
21 <label>Mobile Number</label>
22 <input type="text" id="mobile">
23 <label>Address</label>
24 <textarea id="address"></textarea>
25 <button type="submit">Register</button>
26 </form>
27 </div>
28 </body>
29 </html>
```

Registration page > css > # style.css > button

```
1  body {
2    font-family: Arial, sans-serif;
3    background: linear-gradient(135deg, #4facfe, #00f2fe);
4  }
5  .container {
6    width: 400px;
7    margin: 50px auto;
8    background: white;
9    padding: 20px;
10   border-radius: 10px;
11 }
12 h2 {
13   text-align: center;
14   color: #333;
15 }
16 label {
17   display: block;
18   margin-top: 10px;
19 }
20 input, textarea {
21   width: 100%;
22   padding: 8px;
23   margin-top: 5px;
24 }
25 button {
26   width: 100%;
27   margin-top: 15px;
28   padding: 10px;
29   background: #4facfe;
30   border: none;
31   color: white;
32   font-size: 16px;
33   cursor: pointer;
34 }
35 button:hover {
36   background: #00c6ff;
37 }
```

The image shows a Visual Studio Code editor window with a dark theme. The top bar shows the 'Welcome' page and several open files: 'index.html', 'launch.json', 'style.css', and 'script.js'. The 'script.js' file is active, showing a JavaScript function named 'validateForm'. The function takes several inputs (fname, lname, password, email, mobile, address) and validates them using regular expressions and length checks. It provides feedback via 'alert' boxes for invalid inputs and returns 'true' if all inputs are valid.

```
Registration page > js > JS script.js > validateForm
1  function validateForm() {
2      let fname = document.getElementById("fname").value;
3      let lname = document.getElementById("lname").value;
4      let password = document.getElementById("password").value;
5      let email = document.getElementById("email").value;
6      let mobile = document.getElementById("mobile").value;
7      let address = document.getElementById("address").value;
8      let namePattern = /^[A-Za-z]+$;/;
9      let emailPattern = /^[^ ]+@[^ ]+\.[a-z]{2,3}$/;
10     let mobilePattern = /^[0-9]{10}$/;
11     if (!namePattern.test(fname) || fname.length < 6) {
12         alert("First Name must contain only alphabets and minimum 6 characters");
13         return false;
14     }
15     if (lname === "") {
16         alert("Last Name should not be empty");
17         return false;
18     }
19     if (password.length < 6) {
20         alert("Password must be at least 6 characters long");
21         return false;
22     }
23     if (!emailPattern.test(email)) {
24         alert("Enter a valid Email ID (example@domain.com)");
25         return false;
26     }
27     if (!mobilePattern.test(mobile)) {
28         alert("Mobile number must contain exactly 10 digits");
29         return false;
30     }
31     if (address === "") {
32         alert("Address should not be empty");
33         return false;
34     }
35     alert("Registration Successful!");
36     return true;
37 }
```

OUTPUT:

Travel Guide Registration

First Name

Last Name

Password

Email ID

Mobile Number

Address
